DETAILED ACTION

1. This is in reply to the amendment filed on 06/18/2009. **Claims 1-11 and 18** are pending of which **claims 1, 8, 9-11** are independent. Independent **claims 9 and 11** were allowed previously and **the rest of the independent claims namely, 1, 8 and 10 are amended.**

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119 (a)-(d), which papers have been placed of record in the file.

Examiner Note: The method claim such as the method of developing a program recited in claims 1-7 and 18 is implicitly or inherently tied to the machine or the LSI device as it is recited in the claims. That is the reason why it is statutory subject matter. The allowance is given based only this understanding.

Note: Dependent claims 12-17 are withdrawn. However since the application is allowed these withdrawn claims are canceled. In order to correct that, the following examiner amendment is made.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the claims

12-17. (Canceled).

Allowable Subject Matter

3. **Claims 1-11 and 18 are** allowed.
4. The following is an examiner's statement of reasons for allowance:
5. **Independent Claims 1, 8, 9-11 are allowed for** the following reasons.

Independent claims 9 and 11 were allowed previously for the following reasons,

The art on record does not disclose, teach or fairly suggest the combination of the limitations, including, the following specific functional limitation such as **“the program development supporting system of claim, wherein: the common key information includes an encrypted common key which is obtained by encrypting the raw common key with a raw first intermediate key and an encrypted first intermediate key which is obtained by encrypting the raw first intermediate key with a second intermediate key; and the first step includes the step of obtaining the raw common key using the encrypted common key, the encrypted first intermediate key and a program encryption seed.”**

Referring to amended independent claims 1, 8 and 10, as applicant's representative persuasively argued, the art on record does not disclose, teach or fairly suggest the combination of the limitations, including, the specific functional limitation such as **“the LSI device having a secure memory which includes an unrewritable area”, and “the inherent and permanent key information for the development mode is different from an inherent and permanent key information for the product mode”**

Thus referring to the independent claims 9 and 11,

none of the prior art of record taken singularly or in combination teaches or suggests applicant's invention in particular a program development supporting system including the functional limitation recited above together with other limitation recited in the claims.

Furthermore referring to the independent claims 1, 8 and 10,

none of the prior art of record taken singularly or in combination teaches or suggests applicant's invention in particular a program development supporting system including the amended functional limitation recited in the respective independent claims 1, 8 and 9 together with other limitation recited in the respective claims.

For this reason, independent claims **1, 8-11** are found to be novel and are allowed.

Art Unit: 2432

6. The dependent **claims** which are dependent on the above **independent claims** being further limiting to the independent claim, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
